

Dénes Horváth

Junior Developer

ABOUT ME

My name is Dénes Horváth, and I am studying software development at the University of Szeged. I am highly motivated and result-oriented in the field, aiming to acquire and understand as much as possible. Currently, during my studies, I actively participate in various phases of product development, such as planning, coding, and testing. I apply prescribed quality, safety, and architectural principles in the processes of design, coding, and other development activities.

From a technological perspective, I am currently working with:

HTML5, CSS3, SCSS, JavaScript (ES6), React, WordPress, C#, Java, Git.

I enjoy multimedia tasks, such as image editing (Figma/Photoshop), video editing (Davinci Resolve/Premiere Pro), document structuring, writing, and planning (Microsoft Office).
